Subscription \$1 per year. If paid in advance.
The date to which your subscription is paid will be the address line on your paper.

If the date is not changed within a week after you send money, please let us know.

The Adams County News will be pleased to publish any news or information by the party who sends it. We have both telephones at which our friends telephone the news whenever possible.

Entered as second-class matter December 19, 1907, at the post office at Gettysburg, Pa., under the act of March 3, 1879.

TO OUR READERS

The Adams County News takes no political stand, but wishes to notice all such matters. Anything that appears in the columns of the Adams County News is the opinion of the writer, not the opinion of the newspaper. No matter what the views of the editor or managing editor may be, it is the opinion of the paper that the news is the news, regardless of politics. Politics has nothing to do with news.

Our news columns are open to all candidates and parties.

THE TOP SOIL ROAD.

Details of a Method Which Originated in Clark County, O.

MATERIAL IN FIELDS TAKEN

Salt Used Most Have Enough Sand or Gravel and Clay. - **Clark Co., O.** - **Franklin** - **W. H. Weller**, Con- fessor of Clark Co., O., is calling the top soil method devised by him to have been a success. Other than that he has been successful in getting the top soil off the land with a shade of ease.

The method, which was originated in Clark County, O., is called the top soil method because it consists of removing the top soil from the adjacent fields. It seems to be the idea of the new method of cultivation. The top soil is removed and the ground is leveled. So far as the writer is concerned, the details of having originated this method. The details were worked out at the University of Michigan, at Ann Arbor, and at the university and Clark's county of science.

It is believed that this method depends largely upon the soil used. Just as you can't grow a good crop in sand or gravel or in to rock to rest the action of the rain and weather and cause the top soil to wash away, so you can't grow a good crop in sand or gravel, or in stone or rock.

It is also known that, although clay is well suited to growing a good crop, it is not a good soil for growing a good crop. It is well known that, although clay is well suited to growing a good crop, it is not a good soil for growing a good crop. It is well known that, although clay is well suited to growing a good crop, it is not a good soil for growing a good crop.

In addition to the cost of labor, it is well known that, although clay is well suited to growing a good crop, it is not a good soil for growing a good crop.

In addition to the cost of labor, it is well known that, although clay is well suited to growing a good crop, it is not a good soil for growing a good crop.

NAME TO BE PLACED.

"There will be plentiful this fall from all indications," said Secretary Kallman, of the game commission, "and the deer, moose, bear, rabbits and pheasants are not yet, but later, tarsiers, rabbits and pheasants and all kinds of birds and mammals are more numerous than for many years. This fact is due to enforcement of the laws and the people in the state are learning that those will become extinct unless they observe the laws."

"There are more large animals killed than deer and over 400 of each were killed in Pennsylvania. The number of deer killed in Pennsylvania is greater than ever before. Many people who believed that deer and deer were practically extinct are alive again."

Mr. Holtzworth, however, did not appear.
